Projects

Multiplayer Battleship Game (Full Stack) [🔗](#)

Semester Project

2023/02 – 2023/05

During a university lab course, i collaborated with 4 other colleagues to built a real-time **full stack** application using **React** and **Springboot**. As I was in charge of the Frontend, i had the chance to utilise a broad spectrum the React ecosystem including **React router** library, **Chakra UI** for styling components and also **Framer Motion** to create smooth transitions and animations. Van Life (Car Rental App, Frontend) [🔗](#)

Solo project

2023/01 – 2023/02

To further increase my knowledge in React, i built a car rental website with the help of **react router** library, where i had the opportunity to built scalable routing. Furthermore, i used **Firebase** as a database to store and fetch the data from. See Github Repo here [🔗](#)

Quizzical App (Trivia Game) [🔗](#)

Solo Project

2022/12 – 2023/01

This a simple Trivia application using in **React** open Trivia db as an **API**. This project helped me further my knowledge of handling and fetching data from external sources. In addition to the that, the app is fully **responsive** and viewable in various screen sizes. See Github Repo here [🔗](#)
